TOWN AND COUNTRY PLANNING, WALES

The Planning (Hazardous Substances) (Wales) Regulations 2015

EXPLANATORY NOTE

(This note is not part of the Regulations)

These Regulations consolidate several sets of Regulations made under the Planning (Hazardous Substances) Act 1990 (“the Act”). They also implement the land-use aspects of Directive 2012/18/EU on the control of major-accident hazards involving dangerous substances (O.J. No. L 197, 24.7.2012, p.1) (the “Seveso III Directive”). That Directive amends and repeals Council Directive 96/82/EC. These Regulations apply to Wales.

These Regulations set out—

- (1) in Part 2 and Schedule 1, the substances which are hazardous substances for the purposes of the Act, the controlled quantities of those substances, and exemptions from the need for hazardous substances consent;
- (2) in Part 3 and Schedule 2, the procedure to be followed for an application for hazardous substances consent;
- (3) in Part 4 and Schedule 3, the enforcement of hazardous substances control procedure;
- (4) in Part 5, the information to be held in a consents register;
- (5) in Part 6, the fees required in connection with an application for hazardous substances consent;
- (6) in Part 7, how hazardous substances control applies to hazardous substances authorities;
- (7) in Part 8, the obligation to take certain matters in the Seveso III Directive into account in land-use planning policies and other relevant policies; public consultation and participation obligations in relation to certain plans, programmes and projects; and
- (8) in Part 9, revocations, amendments, savings, transitional provisions and review obligations.

- (c) in all other cases, £250.

(2) Subject to paragraph (3), a fee must be paid to a hazardous substances authority on an application for the continuation of hazardous substances consent under section 17(1) of £200.

(3) Where applications relating to the same site are made to two or more hazardous substances authorities, a fee is to be paid only to the authority in whose area the largest part of the site is situated and the amount payable is the amount that would have been payable if the application had fallen to be made to one authority in relation to the whole site.

(4) Any fee due in respect of an application must accompany the application when it is made to the hazardous substances authority.

(5) Any fee paid pursuant to this regulation must be refunded if the application is rejected as invalidly made.

Fees for deemed applications

23.—(1) Subject to paragraph (5), a fee must be paid to the Welsh Ministers in every case where an application for hazardous substances consent is deemed to have been made by virtue of section 177(5)

of the principal Act (in consequence of an appeal under section 174 of that Act against a hazardous substances contravention notice).

(2) The fee mentioned in paragraph (1) is payable by every person who has made a valid appeal against the relevant hazardous substances contravention notice and whose appeal has not been withdrawn before the date on which the Welsh Ministers issue a notice under paragraph (4).

(3) Subject to paragraph (7), the fee payable is the amount which would be payable under regulation 22 if the application were an application to which that regulation applied.

(4) The fee due must be paid at such time as the Welsh Ministers may in the particular case specify by notice in writing to the appellant.

(5) This regulation does not apply where the appellant had—

- (a) before the date when the hazardous substances contravention notice was issued, applied to the hazardous substances authority for hazardous substances consent for the presence of the quantity of the substance to which the notice relates, and had paid to the authority the fee payable in respect of that application, or
- (b) before the date specified in the notice as the date on which it is to take effect, made an appeal to the Welsh Ministers against the refusal of the hazardous substances authority to grant consent,

and at the date when the relevant notice was issued that application or, in the case of an appeal made before that date, that appeal, had not been determined.

(6) Any fee paid in respect of the deemed application must be refunded to the appellant by the Welsh Ministers if—

- (a) the Welsh Ministers decline jurisdiction on the relevant appeal on the grounds that it does not comply with one or more of the requirements of subsections (1) to (3) of section 174 of the principal Act;

 - (i) the date (or in the event of postponement, the latest date) appointed for the holding of an inquiry or hearing into that appeal; or
 - (ii) in the case of an appeal which is being dealt with by written representations, the date (or in the event of postponement, the latest date) appointed for the inspection of the site to which the notice relates;
- (e) the hazardous substances authority withdraws the relevant hazardous substances contravention notice before it takes effect, or the Welsh Ministers decide that the notice is a nullity;
- (f) the Welsh Ministers allow the relevant appeal on any of the grounds set out in section 174(2)(b) to (e) of the principal Act; or
- (g) the Welsh Ministers allow the relevant appeal on the ground that the notice is invalid, or that it contains a defect, error or misdescription which cannot be corrected under section 176(1)(a) of the principal Act.

(7) Where a hazardous substances contravention notice is varied under section 176(1) of the principal Act otherwise than to take account of a grant of hazardous substances consent under section 177(1), and the fee calculated in accordance with paragraph (3) would have been a lesser amount if the original notice had been in the terms of the varied notice, the fee payable is that lesser amount and any excess amount already paid must be refunded.

(8) In determining a fee under paragraph (7) no account is to be taken of any change in fees which takes effect after the making of the deemed application.

Transitional exemptions: contravention of hazardous substances control

29.—(1) No offence is committed under section 23 of the Act and no hazardous substances contravention notice may be issued in relation to a hazardous substance which is on, over or under any land (“the relevant substance”) if—

- (a) the relevant substance was present on, over or under the land at any time during the establishment period;
- (b) hazardous substances consent was not required for the presence of the relevant substance at the time it was present during the establishment period; and
- (c) hazardous substances consent would have been required for the presence of the relevant substance had these Regulations been in force at that time.

(2) Paragraph (1) does not apply where the quantity of the relevant substance exceeds the maximum quantity of the relevant substance which was present on, over or under the land at any one time during the establishment period.

(3) In this regulation—

“establishment period” means the period of 12 months ending on the relevant date; and

“relevant date” means—

- (a) the commencement date; or
- (b) (if later) the date on which hazardous substances consent was first required for the relevant substance.

Transitional applications and appeals

30.—(1) If an application or appeal relating to a hazardous substances consent made in accordance with the 1992 Regulations has not been determined by the commencement date, the application or appeal is taken to be made under these Regulations.

(2) Anything done under the 1992 Regulations in relation to that application or appeal before the commencement date is taken to be done under these Regulations.

Interpretation of existing consents

31.—(1) In this regulation, “relevant consent” means a hazardous substances consent granted under the 1992 Regulations or a deemed consent claimed before the commencement date under which the following are expressly authorised—

- (a) the presence a category of substance listed in column 1 of part B of Schedule 1 to the 1992 Regulations; or
- (b) the presence of a substance named in column 1 of part A of Schedule 1 to the 1992 Regulations.

(2) This regulation applies to a relevant consent where the category or substance referred to in paragraph (1) above—

- (a) is not contained in Schedule 1 to these Regulations; or
- (b) is differently named or defined under Schedule 1 to these Regulations.

(3) Where this regulation applies references in a relevant consent to a category or substance referred to in paragraph (1) are to be interpreted as if these Regulations had not come into force.

Saving for deemed consent conditions

32.—(1) This regulation applies to any consent that was deemed to be granted under section 11 or 30B before the commencement date.

(2) In relation to any consent to which this regulation applies—

- (a) the conditions set out in Schedule 3 of the 1992 Regulations continue to apply (unless any condition was removed following an application under section 13); and

- (b) those conditions continue to be interpreted in accordance with regulation 15 of the 1992 Regulations.

Other amendments

- 33.** Schedule 4 to these Regulations has effect.

(1) Substances and mixtures are classified in accordance with the CLP Regulation.

(2) Mixtures must be treated in the same way as pure substances provided they remain within concentration limits set according to their properties under the CLP Regulation, or its latest adaptation to technical progress, unless a percentage composition or other description is specifically given.

(3) The controlled quantities set out above relate to each establishment.

The quantities to be considered for the application of these Regulations are the maximum quantities which are present or are likely to be present at any one time.

(4) The following rule governing the addition of hazardous substances, or categories of dangerous substances, applies where appropriate.

In the case of an establishment where no individual hazardous substance is present in a quantity above or equal to the relevant controlled quantity, the following rule must be applied to determine whether the establishment is covered by the relevant requirements of these Regulations. These Regulations apply to establishments if the sum $q_1/Q_{L1} + q_2/Q_{L2} + q_3/Q_{L3} + q_4/Q_{L4} + q_5/Q_{L5} + \dots$ is greater than or equal to 1,

where q_x = the quantity of dangerous substance x (or category of dangerous substances) falling within Part 1 or Part 2 of this Schedule; and

Q_{Lx} = the relevant controlled quantity for hazardous substance or category x from Column 2 of Part 1 or from Column 2 of Part 2 of this Schedule, except as set out in the following paragraph.

For the purposes of calculating Q_{Lx} only, where the hazardous substance is one specified in column 1 of the following table, the relevant controlled quantity is as set out in column 2 of the following table A:

Table A

<i>Column 1</i>	<i>CAS number</i>	<i>Column 2</i>
15. Hydrogen	1333-74-0	5
18. Liquefied flammable gases, Category 1 or 2 (including LPG) and natural gas	-	50

This rule must be used to assess the health hazards, physical hazards and environmental hazards. It must therefore be applied three times—

- (a) for the addition of hazardous substances listed in Part 2 that fall within acute toxicity category 1, 2 or 3 (inhalation route) or STOT SE category 1, together with hazardous substances falling within section H, entries H1 to H3 of Part 1;
- (b) for the addition of hazardous substances listed in Part 2 that are explosives, flammable gases, flammable aerosols, oxidising gases, flammable liquids, self-reactive substances and mixtures, organic peroxides, pyrophoric liquids and solids, oxidising liquids and solids, together with hazardous substances falling within section P, entries P1 to P8 of Part 1;
- (c) for the addition of hazardous substances listed in Part 2 that fall within hazardous to the aquatic environment acute category 1, chronic category 1 or chronic category 2, together with hazardous substances falling within section E, entries E1 and E2 of Part 1.

The relevant provisions of these Regulations apply where any of the sums obtained by (a), (b) or (c) is greater than or equal to 1.

(5) In the case of hazardous substances which are not covered by the CLP Regulation, including waste, but which nevertheless are present, or are likely to be present, in an establishment and which possess or are likely to possess, under the conditions found at the establishment, equivalent properties in terms of major accident potential, these must be provisionally assigned to the most analogous category or named hazardous substance falling within the scope of these Regulations.

(6) In the case of hazardous substances with properties giving rise to more than one classification, for the purposes of these Regulations the lowest controlled quantities apply. However, for the application of the rule in Note 4, the lowest controlled quantity for each group of categories in Notes 4(a), 4(b) and 4(c) corresponding to the classification concerned must be used.

(7) Hazardous substances that fall within Acute Toxic Category 3 via the oral route (H 301) fall under entry H2 ACUTE TOXIC in those cases where neither acute inhalation toxicity classification nor acute dermal toxicity classification can be derived, for example due to lack of conclusive inhalation and dermal toxicity data.

(8) The hazard class Explosives includes explosive articles (see Section 2.1 of Annex I to the CLP Regulation). If the quantity of the explosive substance or mixture contained in the article is known, that quantity must be considered for the purposes of these Regulations. If the quantity of the explosive substance or mixture contained in the article is not known, then, for the purposes of these Regulations, the whole article must be treated as explosive.

(9) Testing for explosive properties of substances and mixtures is only necessary if the screening procedure according to Appendix 6, Part 3 of the UN Recommendations on the Transport of Dangerous Goods, Manual of Tests and Criteria (UN Manual of Tests and Criteria)(1) identifies the substance or mixture as potentially having explosive properties.

(10) If Explosives of Division 1.4 are unpacked or repacked, they must be assigned to the entry P1a, unless the hazard is shown to still correspond to Division 1.4, in accordance with the CLP Regulation.

(11.1) Flammable aerosols are classified in accordance with the Council Directive 75/324/EEC of 20 May 1975 on the approximation of the laws of the Member States relating to aerosol dispensers(2) (Aerosol Dispensers Directive). “Extremely flammable” and “Flammable” aerosols of Directive 75/324/EEC correspond to Flammable Aerosols Category 1 or 2 respectively of the CLP Regulation.

(1) More guidance on waiving of the test can be found in the A.14 method description, *see* Commission Regulation (EC) No. 440/2008 of 30 May 2008 laying down test methods pursuant to Regulation (EC) No. 1907/2006 of the European Parliament and of the Council of the Registration Evaluation, Authorisation and Restriction of Chemicals (REACH) (O.J. L 142, 31.5.2008, p.1).

(2) O.J. L 147, 9.6.1975, p.40.

(11.2) In order to use this entry, it must be documented that the aerosol dispenser does not contain Flammable Gas Category 1 or 2 nor Flammable Liquid Category 1.

(12) According to paragraph 2.6.4.5 in Annex I to the CLP Regulation, liquids with a flash point of more than 35 °C need not be classified in Category 3 if negative results have been obtained in the sustained combustibility test L.2, Part III, section 32 of the UN Manual of Tests and Criteria. This is however not valid under elevated conditions such as high temperature or pressure, and therefore such liquids are included in this entry.

(13) Ammonium nitrate (5,000/10,000): fertilisers capable of self-sustaining decomposition

This applies to ammonium nitrate-based compound/composite fertilisers (compound/composite fertilisers contain ammonium nitrate with phosphate and/or potash) which are capable of self-sustaining decomposition according to the UN Trough Test (see UN Manual of Tests and Criteria, Part III, subsection 38.2), and in which the nitrogen content as a result of ammonium nitrate is—

- (a) between 15.75%(1) and 24.5%(2) by weight, and either with not more than 0.4% total combustible/organic materials or which fulfil the requirements of Annex III-2 to Regulation (EC) No 2003/2003 of the European Parliament and of the Council of 13 October 2003 relating to fertilisers(3);
- (b) 15.75% by weight or less and unrestricted combustible materials.

(14) Ammonium nitrate (1,250/5,000): fertiliser grade

This applies to straight ammonium nitrate-based fertilisers and to ammonium nitrate-based compound/composite fertilisers which fulfil the requirements of Annex III-2 to Regulation (EC) No 2003/2003 and in which the nitrogen content as a result of ammonium nitrate is—

- (a) more than 24.5% by weight, except for mixtures of straight ammonium nitrate based fertilisers with dolomite, limestone and/or calcium carbonate with a purity of at least 90%;
- (b) more than 15.75% by weight for mixtures of ammonium nitrate and ammonium sulphate;
- (c) more than 28%(4) by weight for mixtures of straight ammonium nitrate-based fertilisers with dolomite, limestone and/or calcium carbonate with a purity of at least 90%.

(15) Ammonium nitrate (350/2,500): technical grade

This applies to ammonium nitrate and mixtures of ammonium nitrate in which the nitrogen content as a result of the ammonium nitrate is—

- (a) between 24.5% and 28% by weight, and which contain not more than 0.4% combustible substances;
- (b) more than 28% by weight, and which contain not more than 0.2% combustible substances.

It also applies to aqueous ammonium nitrate solutions in which the concentration of ammonium nitrate is more than 80% by weight.

(16) Ammonium nitrate (10/50): 'off-specs' material and fertilisers not fulfilling the detonation test.

This applies to—

- (a) material rejected during the manufacturing process and to ammonium nitrate and mixtures of ammonium nitrate, straight ammonium nitrate-based fertilisers and ammonium nitrate-based compound/composite fertilisers referred to in Notes 14 and 15, that are being or have been returned from the final user to a manufacturer, temporary storage or reprocessing plant for reworking, recycling or treatment for safe use, because they no longer comply with the specifications of Notes 14 and 15;

(1) 15.7% nitrogen content by weight as a result of ammonium nitrate corresponds to 45% ammonium nitrate.

(2) 24.5% nitrogen content by weight as a result of ammonium nitrate corresponds to 70% ammonium nitrate.

(3) O.J. L 304, 21.11.2003, p.1.

(4) 28% nitrogen content by weight as a result of ammonium nitrate corresponds to 80% ammonium nitrate.

(b) fertilisers referred to in Note 13(a), and Note 14(a) to this Schedule which do not fulfil the requirements of Annex III-2 to Regulation (EC) No 2003/2003.

(17) Potassium nitrate (5,000/10,000)

This applies to those composite potassium-nitrate based fertilisers (in prilled/granular form) which have the same hazardous properties as pure potassium nitrate.

(18) Potassium nitrate (1,250/5,000)

This applies to those composite potassium-nitrate based fertilisers (in crystalline form) which have the same hazardous properties as pure potassium nitrate.

(19) Upgraded biogas

For the purpose of the implementation of these Regulations, upgraded biogas may be classified under entry 18 of Part 2 of Schedule 1 where it has been processed in accordance with applicable standards for purified and upgraded biogas ensuring a quality equivalent to that of natural gas, including the content of Methane, and which has a maximum of 1% Oxygen.

(20) Polychlorodibenzofurans and polychlorodibenzodioxins

The quantities of polychlorodibenzofurans and polychlorodibenzodioxins are calculated using the factors in Table 1—

(21) In cases where this hazardous substance falls within category P5a Flammable liquids or P5b Flammable liquids, then for the purposes of these Regulations the lower controlled quantity applies.

PART 3

Substances used in an industrial chemical process

<i>Column 1 Hazardous Substances</i>	<i>Column 2 Controlled quantity</i>
Where it is reasonable to foresee that a substance falling within Part 1 or Part 2 may be generated during loss of control of the processes (“HS”), any substance which is used in that process (“S”).	The amount of S which it is believed may generate (on its own or in combination with other substances used in the relevant industrial chemical process) an amount equal to or exceeding the controlled quantity of the HS in question.

NOTES TO PART 3

1. The expression “reasonable to foresee...may be generated during loss of control of the processes” has the same meaning as in the Directive.

2. Where a hazardous substance falling within Part 1 or 2 also falls within Part 3, the classification with the lowest controlled quantity applies, subject to note 3 to the notes to Parts 1 and 2.

PART 5

Sections of the principal Act as modified

“**174.**—(1) A person having an interest in the land to which a hazardous substances contravention notice relates or a relevant occupier may appeal to the Welsh Ministers against the notice, whether or not a copy of it has been served on them.

(2) An appeal may be brought on any of the following grounds—

- (a) that, in respect of any contravention of hazardous substances control specified in the notice, hazardous substances consent ought to be granted for the quantity of the hazardous substance present on, over or under the land or, as the case may be, the condition concerned ought to be discharged;
- (b) that the matters alleged to constitute a contravention of hazardous substances control have not occurred;
- (c) that these matters (if they occurred) do not constitute a contravention of hazardous substances control;
- (d) that copies of the hazardous substances contravention notice were not served as required by or under section 24(4) of the Planning (Hazardous Substances) Act 1990;
- (e) that the steps required by the notice to be taken exceed what is necessary to remedy any contravention of hazardous substances control;
- (f) that any period specified in the notice in accordance with section 24(5)(b) of that Act falls short of what should reasonably be allowed.

(3) An appeal under this section must be made—

- (a) by giving written notice of the appeal to the Welsh Ministers before the date specified in the hazardous substances contravention notice as the date on which it is to take effect; or
- (b) by sending such notice to them in a properly addressed and pre-paid letter posted to them at such time that, in the ordinary course of post, it would be delivered to them before that date; or
- (c) by sending such notice to them using electronic communications at such time that, in the ordinary course of transmission, it would be delivered to them before that date.

(4) A notice under subsection (3) must be accompanied by a copy of the hazardous substances contravention notice, together with a statement—

- (a) specifying the grounds on which the appeal is being made against the hazardous substances contravention notice; and
- (b) setting out the appellant’s submissions in relation to each ground of appeal.

(5) If, where more than one ground is specified in that statement, the appellant does not in that statement give information required under subsection (4)(b) in relation to each of those grounds the Welsh Ministers may determine the appeal without considering any ground as to which the appellant has failed in that statement to give such information.

(6) In this section “relevant occupier” means a person who—

- (a) on the date on which the hazardous substances contravention notice is issued occupies the land to which the notice relates by virtue of a licence; and
- (b) continues so to occupy the land when the appeal is brought.

175.

(1) The Welsh Ministers may by regulations prescribe the procedure which is to be followed on appeals under section 174 and, in particular, but without prejudice to the generality of this subsection, may—

- (a) require the hazardous substances authority to submit, within such time as may be prescribed, a statement indicating the submissions which they propose to put forward on the appeal;
- (b) specify the matters to be included in such a statement;
- (c) require the authority or the appellant to give such notice of such an appeal as may be prescribed;
- (d) require the authority to send to the Welsh Ministers, within such period from the date of the bringing of the appeal as may be prescribed, a copy of the hazardous substances contravention notice and a list of the persons served with copies of it.

(2) The notice to be prescribed under subsection (1)(c) must be such notice as in the opinion of the Welsh Ministers is likely to bring the appeal to the attention of persons in the locality in which the land to which the hazardous substances contravention notice relates is situated.

(3) Subject to section 176(4), the Welsh Ministers must, if either the appellant or the hazardous substances authority so desire, give each of them an opportunity of appearing before and being heard by a person appointed by the Welsh Ministers for the purpose.

(4) Where an appeal is brought under section 174 the hazardous substances contravention notice, subject to any order under section 289(4A), has no effect pending the final determination or the withdrawal of the appeal.

(5) Where any person has appealed to the Welsh Ministers against a hazardous substances contravention notice, no person is entitled, in any other proceedings instituted after the making of the appeal, to claim that the notice was not duly served on the person who appealed.

(6) Schedule 6 applies to appeals under section 174, including appeals under that section as applied by regulations under section 25(1) of the Planning (Hazardous Substances) Act 1990.

(7) Subsection (5) of section 250 of the Local Government Act 1972 (which authorises a Minister holding an inquiry under that section to make orders with respect to the costs of the parties) shall apply in relation to any proceedings before the Welsh Ministers on an appeal under section 174 as if those proceedings were an inquiry held by the Welsh Ministers under section 250.

176.

(1) On an appeal under section 174 the Welsh Ministers may—

- (a) correct any defect, error or misdescription in the hazardous substances contravention notice; or
- (b) vary the terms of the hazardous substances contravention notice,

if they are satisfied that the correction or variation will not cause injustice to the appellant or the hazardous substances authority.

(2) Where the Welsh Ministers determine to allow the appeal, they may quash the notice.

(2A) The Welsh Ministers must give any directions necessary to give effect to their determination on the appeal.

(3) The Welsh Ministers—

- (a) may dismiss an appeal if the appellant fails to comply with section 174(4); and
- (b) may allow an appeal and quash the hazardous substances contravention notice if the hazardous substances authority fail to comply with regulation 16(2) of the Planning (Hazardous Substances) (Wales) Regulations 2015.

(4) If [section 175\(3\)](#) would otherwise apply and the Welsh Ministers propose to dismiss an appeal under paragraph (a) of subsection (3) or to allow an appeal and quash the hazardous substances contravention notice under paragraph (b) of that subsection, they need not comply with section 175(3).

(5) Where it would otherwise be a ground for determining an appeal under section 174 in favour of the appellant that a person required to be served with a copy of the hazardous substances contravention notice was not served, the Welsh Ministers may disregard that fact if neither the appellant nor that person has been substantially prejudiced by the failure to serve them.

177.

(1) On the determination of an appeal under section 174, the Welsh Ministers may—

- (a) grant hazardous substances consent for the presence of the hazardous substance on, over or under the land to which the hazardous substances contravention notice relates or on, over or under part of that land;
- (b) discharge any condition subject to which hazardous substances consent was granted.

(2) In considering whether to grant hazardous substances consent under subsection (1), the Welsh Ministers must have regard to the considerations specified in section 9(2) of the Planning (Hazardous Substances) Act 1990.

(3) The hazardous substances consent that may be granted under subsection (1) is any hazardous substances consent that might be granted on an application under the Planning (Hazardous Substances) Act 1990.

(4) Where under subsection (1) the Welsh Ministers discharge a condition they may substitute another condition for it, whether more or less onerous.

(5) Where an appeal against a hazardous substances contravention notice is brought under section 174, the appellant is deemed to have made an application for hazardous substances consent in respect of the matters specified in the hazardous substances contravention notice as constituting a contravention of hazardous substances control.

(5A) Where—

- (a) the statement under subsection (4) of section 174 specifies the ground mentioned in subsection (2)(a) of that section;
- (b) any fee is payable under regulations made by virtue of section 26A of the Planning (Hazardous Substances) Act 1990 in respect of the application deemed to be made by virtue of the appeal; and
- (c) the Welsh Ministers give notice in writing to the appellant specifying the period within which the fee must be paid,

then, if that fee is not paid within that period, the appeal, so far as brought on that ground, and the application lapses at the end of that period.

(6) Any hazardous substances consent granted under subsection (1) on an appeal must be treated as granted on the application deemed to have been made by the appellant.

(7) In relation to a grant of hazardous substances consent or a determination under subsection (1) the Welsh Ministers' decision is final.

(8) For the purposes of section 28 of the Planning (Hazardous Substances) Act 1990 the Welsh Ministers' decision must be treated as having been given by them in dealing with an application for hazardous substances consent made to the hazardous substances authority.

178.

(1) Where any steps required by a hazardous substances contravention notice to be taken are not taken within the period for compliance with the notice, the hazardous substances authority may—

- (a) enter the land and take the steps; and
- (b) recover from the person who is then the owner of the land any expenses reasonably incurred by them in doing so.

(2) Where a copy of a hazardous substances contravention notice has been served in respect of any contravention of hazardous substances control—

- (a) any expenses incurred by the owner or occupier of any land for the purpose of complying with the notice, and
- (b) any sums paid by the owner of any land under subsection (1) in respect of expenses incurred by the hazardous substances authority in taking steps required by such a notice to be taken,

are deemed to be incurred or paid for the use and at the request of the person by whom the contravention of hazardous substances control was committed.

(3) Regulations made under this Act may provide that—

- (a) section 276 of the Public Health Act 1936, (power of local authorities to sell materials removed in executing works under that Act subject to accounting for the proceeds of sale);
- (b) section 289 of that Act (power to require the occupier of any premises to permit works to be executed by the owner of the premises); and
- (c) section 294 of that Act (limit on liability of persons holding premises as agents or trustees in respect of the expenses recoverable under that Act),

apply, subject to such adaptations and modifications as may be specified in the regulations, in relation to any steps required to be taken by a hazardous substances contravention notice.

(4) Regulations under subsection (3) applying section 289 of the Public Health Act 1936 may include adaptations and modifications for the purpose of giving the owner of land to which a hazardous substances contravention notice relates the right, as against all other persons interested in the land, to comply with the requirements of the hazardous substances contravention notice.

(5) Regulations under subsection (3) may also provide for the charging on the land of any expenses recoverable by a hazardous substances authority under subsection (1).

(6) Any person who wilfully obstructs a person acting in the exercise of powers under subsection (1) is guilty of an offence and liable on summary conviction to a fine not exceeding level 3 on the standard scale.

(7) Where different periods are specified for different steps under section 24(5)(b) of the Planning (Hazardous Substances) Act 1990 in relation to a hazardous substances contravention notice, references in this section and in section 179 to the period for compliance with a hazardous substances contravention notice, in relation to any step, are to the period at the end of which the step is required to have been taken.

179.

(1) Where, at any time after the end of the period for compliance with a hazardous substances contravention notice, any steps required by the notice to be taken have not been taken, the person who is then the owner of the land and any person other than the owner who is in control of the land is in breach of the notice.

(2) Where a person is in breach of a hazardous substances contravention notice that person is guilty of an offence.

(3) In proceedings against any person for an offence under subsection (2), it is a defence for that person to show that they did everything they could be expected to do to secure compliance with the notice.

...

(6) An offence under subsection (2) may be charged by reference to any day or longer period of time and a person may be convicted of a second or subsequent offence under the subsection in question by reference to any period of time following the preceding conviction for such an offence.

(7) Where—

(a) a person charged with an offence under this section has not been served with a copy of the hazardous substances contravention notice; and

(b) the notice is not contained in the appropriate register kept under section 188,

it is a defence for that person to show that they was not aware of the existence of the notice.

(8) A person guilty of an offence under this section is liable—

(a) on summary conviction, to a fine not exceeding £20,000; and

(b) on conviction on indictment, to a fine.

(9) In determining the amount of any fine to be imposed on a person convicted of an offence under this section, the court must in particular have regard to any financial benefit which has accrued or appears likely to accrue to that person in consequence of the offence.

180.

(1) Where, after the service of a copy of a hazardous substances contravention notice, hazardous substances consent is granted for the presence of a hazardous substance on, over or under the land to which the notice relates, the notice ceases to have effect so far as inconsistent with that consent.

...

(3) The fact that a hazardous substances contravention notice has wholly or partly ceased to have effect by virtue of this section does not affect the liability of any person for an offence in respect of a previous failure to comply, or secure compliance, with the notice.

181.

(1) Compliance with a hazardous substances contravention notice does not discharge that notice.

(2) Without prejudice to subsection (1), where a provision of a hazardous substances contravention notice requires a hazardous substance to be removed from the land to which the notice relates, the presence on, over or under that land of a quantity of that substance equal to or exceeding its controlled quantity at any time after the substance has been removed in compliance with the hazardous substances contravention notice is in contravention of that notice.

(3) Without prejudice to subsection (1), where a provision of a hazardous substances contravention notice requires the quantity of a hazardous substance on, over or under the land to which the notice relates to be reduced below a specified quantity (being greater than the controlled quantity), the presence on, over or under that land of a quantity of that substance equal to or in excess of the specified quantity at any time after the quantity of that substance has been reduced below the specified quantity in compliance with the hazardous substances contravention notice, is in contravention of that notice.

(4) Without prejudice to subsection (1), where a provision of a hazardous substances contravention notice requires steps to be taken to remedy a failure to comply with a condition subject to which a hazardous substances consent was granted, after those steps have been taken

no further steps may be taken which would constitute a breach of that condition, and the taking of such further steps is in contravention of that notice.

(5) Sections 178 and 179 apply to the contravention of a hazardous substances contravention notice to which this section applies as if the period for compliance with the notice had expired on the date the contravention took place, but the hazardous substances authority must not enter the land under section 178(1) without, at least 28 days before their entry, serving on the owner or occupier of the land a notice of their intention to do so.

188.

(1) Every hazardous substances authority must keep an enforcement register containing the following information in respect of each hazardous substances contravention notice issued by them—

- (a) the address of the land to which the notice relates;
- (b) the date of service of copies of the notice;
- (c) a statement of the alleged contravention of hazardous substances control, the steps required by the notice to remedy the contravention, and the period within which such steps are to be taken;
- (d) the date specified in the notice as the date on which it is to take effect;
- (e) the date and effect of any variation of the notice;
- (f) the date of any appeal to the Welsh Ministers against the notice and the date of the final determination of the appeal.

(1A) The entry relating to the hazardous substances contravention notice and everything relating to any such notice must be removed from the register if the notice is quashed by the Welsh Ministers or withdrawn.

(1B) The register must include an index to enable any person to trace an entry in the register.

(1C) Every entry in the register must be made within 14 days of the relevant information being available to the hazardous substances authority.

(2) The register must be kept at the principal office of the hazardous substances authority.

(3) Every register kept under this section must be available for inspection by the public at all reasonable hours.

285.

(1) The validity of a hazardous substances contravention notice may not, except by way of an appeal under Part VII, be questioned in any proceedings whatsoever on any of the grounds on which such an appeal may be brought.

(2) Subsection (1) does not apply to proceedings brought under section 179 against a person who—

- (a) has held an interest in the land since before the hazardous substances contravention notice was issued under that Part;
- (b) did not have a copy of the hazardous substances contravention served on them under that Part; and
- (c) satisfies the court—
 - (i) that they did not know and could not reasonably have been expected to know that the hazardous substances contravention notice had been issued; and
 - (ii) that their interests have been substantially prejudiced by the failure to serve them with a copy of it.

289.

(1) Where the Welsh Ministers give a decision in proceedings on an appeal under Part VII against a hazardous substances contravention notice the appellant or the hazardous substances authority or any other person having an interest in the land to which the notice relates may,

according as rules of court may provide, either appeal to the High Court against the decision on a point of law or require the Welsh Ministers to state and sign a case for the opinion of the High Court.

...

(3) At any stage of the proceedings on any such appeal as is mentioned in subsection (1), the Welsh Ministers may state any question of law arising in the course of the proceedings in the form of a special case for the decision of the High Court.
