Subject: RE: Risk Assessment of Walked Routes to School - Monitoring Form

Afternoon ,

Apologies for not getting back to you sooner but I have been off work due to illness.

Also The Education Transport Team is moving as from 1st April and will come under the management
Control of Neighbourhood Services.

The issue of SWRTS has therefore been marked as a priority for my first 1 to 1 with my new line manager.

Before my meeting I would however like to clarify a few points:

- Do we pro-actively have to assess every single route or do we only have to react to any issues raised
- Whilst reacting to any concerns raised should transport be provided until route is deemed available
- Neighbour services already consult schools through their School travel plans . Can these plans
Be used as our consultation document

Thanks
Steve
