**Subject:** RE: Barry Biomass

[REDACTED]

Just a quick note to record my telephone call of a moment ago to Douglas Wardle of Power Consulting Midlands Ltd who represent Biomass UK No.2 Ltd in respect of the section 73 application.

I conveyed to him his offer of a voluntary environmental statement would have to be provided in the context of the duty of sincere co-operation. I had to explain it derived from one of the European treaties and was referenced in the letter sent to him. His letter should set out what he means by 'environmental statement'. He has spoken to a consultant who has done a similar addendum in Cheshire and so will email to explain his offer after the Easter weekend.

Many thanks

Hywel
