Introduction

Flood and Coastal Erosion Risk Management - Small Scale Works Grant

The Flood and Coastal Erosion Risk Management Small Scale Works Grant is open to Local Authorities to take forward smaller flood alleviation projects utilising Welsh Government funding.

As with the capital programme, projects must **reduce risk to people and properties** maintain their current levels of protection.

Authorities are invited to submit applications for individual projects up to a maximum value **£200,000 per project** and can submit multiple applications for projects which can be completed within the financial year. One application form should be submitted per project.

All works must be undertaken, completed and claimed for within the financial year.

Guidance for the Small Scale Works Grant including what is and is not eligible for funding can be found [here](#).

Evidence to be submitted with application forms should include (where appropriate):

- Maps showing location of proposed works
- Flood maps showing risk
- Section 19 reports
- Photos/evidence of past flooding and/or annotated maps showing how previous flooding incidents occurred (flow paths etc.)
- Pre-construction photos of area affected by proposed works
- Reference to Local Flood Risk Management Strategies where appropriate

Failure to provide sufficient evidence may result in the application being delayed or rejected.

All works undertaken must be done under the requirements of the Grant Memorandum for Flood and Coastal Erosion Risk Management which can be found [here](#).

For queries related to any of the Flood & Coastal Erosion Risk Management Grants, please contact the Welsh Government Flood Branch at FloodCoastalRisk@gov.wales

If you have any technical issues completing your application online, you should contact the Customer Contact Centre using your RPW Online account or by telephone on 0300 062 5004.

Privacy notice: Welsh Government Flood, Coastal Erosion, Risk Management grants

Introduction/Background

The Welsh Government provides grant funding to flood risk management authorities for the purpose of reducing the risks from flooding and/or coastal erosion.

In order for us to manage the grants we will need to process some personal data about you and your organisation in order to administer and issue the grant.

Before we provide grant funding to you and during the term of the grant award, we may undertake checks for the purposes of preventing fraud and money laundering, and to verify your identity.

What is the Lawful Basis for processing?

The Welsh Government will be the data controller for any personal data you provide in relation to your grant application or request for grant funding. We will process it in line with our public task and the official authority vested in us to provide financial assistance through grant funding to support ministerial objectives, to prevent fraud and money laundering, and to verify identities. Such processing is also a requirement of the grant funding you have requested and will help us assess your eligibility to receive the grant funding.

What personal information do we need to process?

In order to process your grant we will need the following personal information:

- name
- office address and office address history
- organisational contact details such as email address and telephone numbers
- third party organisation details

Why do we need to process your personal data?

The Welsh Government use your information to keep you as a point of contact to administer your application for grant funding. Additionally we, and fraud prevention agencies, may use this information, including any personal data, to prevent fraud and money laundering, and to verify your identity. We and fraud prevention agencies may also enable law enforcement agencies to access and use your personal data to detect, investigate and prevent crime.

We, and fraud prevention agencies, may use this information, including any personal data, to prevent fraud and money laundering, and to verify your identity. We and fraud prevention agencies may also enable law enforcement agencies to access and use your personal data to detect, investigate and prevent crime.

How long will we keep your personal information?

The Welsh Government will keep your personal information for a period of between seven and ten years depending on the nature of the grant award after the completion of your grant in line with our Data Retention Policy.

Fraud prevention agencies can hold your personal data for different periods of time, depending on how that data is being used. Please contact us for more information. If you are considered to pose a fraud or money laundering risk, your data can be held by fraud prevention agencies for up to 6 years from its receipt.

Will your personal information be shared?

The Welsh Government may share your information with fraud prevention agencies if we suspect or detect fraud. We may share only relevant information for publicity and post scheme completion evaluations.

Administrators of RPW online may have access to your personal information as a part of their routine monitoring and management of the platform.

Your rights:

Under the UK GDPR you have the following rights:

- To access a copy of your own data;
- For us to rectify inaccuracies in that data;
- To object to or restrict processing (in certain circumstances);
- For your data to be 'erased' (in certain circumstances); and
- To lodge a complaint with the Information Commissioner's Office (ICO) who is our independent regulator for data protection.

Contact Information

The contact details for the Information Commissioner's Office are:

Senedd Constituency	Ynys Môn
Senedd Region	North Wales
Estimated start date	10/06/2024
Estimated end date	29/07/2024

Evidence of Flooding	
CARR Name	Llanddaniel Fab (3174)
Flood risk being addressed	Pluvial
Actual Flood Events	
Frequency - number of incidents	1
Impact - total number of homes affected over the last 20 years	1

Actual Flood Events		
Date of flood incident	Number of properties affected	Evidence of flooding
22/11/2017	1	FIR

Costs and Benefits

Properties Benefitting

Based on best available information please provide estimates of the number of properties which will benefit in comparison with not doing the work

Homes	5
-------	---

Businesses	0
------------	---

Total Properties	5
------------------	---

Total Cost of Works (£)	156572
-------------------------	--------

How have the costs provided been estimated?	estimates from the Highways maintenance term contract, with an allowance for risk and design and supervision fees
---	---

Wider Benefits and Well-being Goals

Wider Benefits

Please provide details of any potential benefits which this scheme could provide to the wider community.

This could include reducing the risk to other assets, community buildings etc. or providing additional benefits such as recreational facilities.

Wider Benefits

1	Benefit Description	Health and Wellbeing
	Enter Details	Those suffering or at risk of flooding, often suffer anxiety during bad weather and improvements in drainage capacity will reduce or remove this mental health pressure. In doing so, the Well-Being Goal of a Healthier Wales is being realised. Measurement of this is likely to be purely anecdotal initially, but over time patterns in the pressure on medical services could become apparent.
2	Benefit Description	Benefit to local employment
	Enter Details	Investment in small scale schemes allows local contractors to undertake the work. Our Term Maintenance Contractor employs local, largely Welsh Speaking Labour and smaller local sub-contractors. In a small way, this works to encourage a Wales of vibrant culture and a thriving Welsh Language. Using such local contractors provides the basis for them to provide employment directly to local Welsh Speaking employees better enabling people to fulfil their potential, which is an aim

Well-being Goals

Please provide specific examples of how the activities listed will contribute to the wellbeing goals. You may not need to add something for each goal, just those relevant to the work being undertaken.

Well-being Goals

1	Well-being Goal	A resilient Wales
	Enter Details	The Wellbeing of Future Generations Act wants to make Wales a better place to live now and into the future. Climate change is identified as one of the challenges facing Wales in the future and a Resilient Wales is one of the 7 Well-Being Goals. Reducing the risk and impact of flooding is directly related to this goal and the Act states how decisions made now need to be sustainable, consider the long term and how to stop problems happening in the first place. In the light of the increased storminess associated with climate change,

enhancements and improved capacity in drainage systems will work towards achieving this goal and can be measured by a reduced frequency of flooding incidents and a reduction in the costs associated with these incidents.

2 Well-being Goal

A Wales of cohesive communities

Enter Details

Flooding problems can blight an area and improvement in drainage infrastructure can alleviate this blight and in turn help create an attractive, viable and safe community, achieving this is working towards the well-being goal of A Wales of cohesive communities. Measurement of this could initially be related to property values

Details of Proposed Work

In considering the reasons why this work is required, please also address the following:

- Is this is an isolated problem or part of a wider catchment flood risk issue?
- Are there any other options for managing the risk?
- How does this link with your Local Flood Risk Management Strategy, Flood Risk Management Plan and/or Shoreline Management Plan?
- Explain the flood mechanism and history of flooding or near misses.

Please outline the reasons why this work is required.

This is an isolated problem other flood risk management options have been considered but this was deemed the most appropriate, the work being required to ensure that the previous scheme works to it's full capacity and realises its full benefits.

- This work is also allied to objective 4 in Anglesey's Local Flood Risk Management Strategy in that it aims to reduce the impact and consequences for individuals, communities, businesses and the environment from flooding and coastal erosion.
- Sub objective 4.5 tasks Anglesey County Council to improve the capacity of existing drainage systems

Please provide details of the proposed works to be undertaken and identify how these will improve flood risk

The work involves repairing and where required, replacing, a carrier drain serving a drainage system for the stad Plas Hen housing estate. This work will assure the effectiveness of a previous scheme and reduce the flood risk to properties in the estate.

Consultations and Consents

What consultation do you intend to do prior to commencing work and are any issues envisaged? No major consultation is proposed for these works. Locally discussions will be held with the homeowners who are immediately affected by the works as the works are carried out.

Please consider the statutory consents/permissions which may be needed for this projects, (including but not limited to):

- Ordinary Watercourse Consents;
- Marine Licensing;
- Coast Protection Act Approval;
- Environmental Impact Analysis (Land Drainage Improvement Works) Regulations.

What statutory consents/permissions are needed and has sufficient time been allowed to obtain these consents? time has been allowed for agreement to be reached with the landowner, initial approaches have been made and are favourable.

Are there any other environmental issues associated with the project? no

Value for Money

How will this work be procured? the work will be carried out by the Highways Term Maintenance Contractor

What are the key risks associated with the delivery of this project?

Failure of the Contractor to perform
Failure to perform is deemed a moderate risk.

Extreme adverse weather
The timing of these proposed works is such that it is hoped that adverse weather can be managed with the timescale available, consequently, adverse weather risks are deemed to be low.

Statutory Undertakers Plant/Underground services
Underground services could cause alignment issues. These are considered a moderate risk.

Landowner consent
Failure to achieve agreement would prevent the scheme from being undertaken. This is currently considered a moderate risk

Staff resources
Any reduction in staff resources would impact delivery. This is currently considered a moderate risk.

Unforeseen ground conditions.
Poor or hard ground conditions could impinge on delivery of the scheme. This is considered a moderate risk.

Please include any other information you feel would be relevant to support your application. Small scale schemes such as these have proven to successfully address flood risk issues and resilience to flooding to properties and infrastructure and are an effective investment.

Checklist of Supporting Documents

Evidence to support applications

Whilst the Small Scale Works Grant applications provide a simplified process for lower value works, there is still a requirement to submit relevant data and information to support the application.

Evidence to be submitted with application forms should include (where appropriate):

- Maps showing location of proposed works
- Flood maps showing risk
- Section 19 reports
- Photographs/evidence of past flooding and/or annotated maps showing how previous flooding incidents occurred (flow paths etc.)
- Pre-construction photos of area affected by proposed works
- Reference to Local Flood Risk Management Strategies where appropriate

Failure to provide sufficient evidence may result in the application being delayed or rejected.

Tick the appropriate box

I am submitting supporting documents.

There are no supporting documents relevant to my application.

I confirm that I am authorised to submit this application.

I confirm that, to the best of my knowledge, all the information provided is accurate and based on the best data currently available.

I agree to the above declarations and undertakings*
